

# CASE STUDY

## About the Client

Having begun its journey in 1995, this Pharma company operates in 34 overseas destinations leveraging 14000 happy employees and is now one of the leading Pharma Manufacturing Companies in India.

## Solution

Wheebox designed the assessment for the client which consisted of domain knowledge on pharmaceuticals. The campus drives happened at campuses in North India and 350 candidates offered. Wheebox provided on ground support at the campuses to support the recruiters in running smooth assessments, sharing results with them real time just after the assessments are completed and conducting the interviews same day to roll out offers to the selected candidates. The recruiters were at ease as it was the first time they went for an online assessment from pen and paper form. The end to end support at the campuses helped them meet their numbers in time and expedite the process at the campuses.

## Problem Statement

For the first time they wished to go for Online assessments to hire candidates from campuses who were freshers from courses such as B.-Pharma and M.Pharma. Earlier they used to conduct pen and paper assessments.
