## The Process

With the company being at a significant stage of growth they intend on hiring at least 1 lakh candidates in a year.

However, hiring in bulk numbers would put a huge logistical burden on their recruitment team.

The client wanted assistance with:

- 1.** Formulating a recruitment plan for the company, within a short span of time.
- 2.** Ensuring the recruitment of highly talented and intelligent candidates by evaluating them using appropriate recruiting strategy.
- 3.** End to end solutions such as creating test content, providing online platform, managing offline test centres and providing technical support.
