

CASE STUDY

About the Client

The client is a best-in-class integrated engineering consultancy solutions provider. The organisation has expertise of over five decades, presence in almost all key industry segments, capabilities to handle multi-dimensional, large scale assignments and long-term relationships built across the globe.

Solution

1. Wheebox identified critical to quality parameters in conjunction with the client and created standardised assessments consisting of skills including coding, case studies and behavioural competencies.
2. Wheebox provided online assessments and platform to address the issue of time consuming and costly recruitment process.
3. Provided an in-depth analysis through evaluation reports for each candidate assessed.
4. Approximately 27,000 assessments have been conducted using the framework.

The Process

The volume of hiring in the company is extensive and they are constantly on the lookout for bright engineering graduates/ITI diploma holders.

The organisation was looking to-

- Streamline Their Hiring Process
- Improve the Quality of Hire
- Reduce Cost and Time Per Hire
- Improve Offer to Interview Ratio
